Career Objective

Aspiring Full Stack Web Developer with a strong foundation in Java and modern web technologies. I aim to apply my skills in real-world projects, contribute to dynamic teams, and continuously learn from industry best practices. Seeking opportunities in innovative tech-driven environments such as startups or product-based companies.

Technical Skills

Frontend: HTML, CSS, Bootstrap, JavaScript, React.js

Backend: Java, JSP, Hibernate, Spring, Spring MVC, Spring Boot

Database & Tools: MySQL, MySQL Workbench, Git, GitHub, Postman, Maven, Apache Tomcat

Projects

1. Role-Based E-commerce Shopping Cart Application

Technologies: Java, Spring Boot, Spring Security, Spring MVC, JPA/Hibernate, Maven, Git, RESTful APIs, Bootstrap

- Developed a secure e-commerce web platform with distinct user roles: Admin and Customer.
- Implemented RESTful API architecture using Controller-Service-Repository layers.
- Designed custom authentication and authorization with Spring Security.
- Ensured modularity and scalability with clean code practices.

GitHub: <https://github.com/Anurag-git12345/Shopping-cart>

2. Hospital Management System

Technologies: Java, Servlets, JSP, HTML, CSS, JavaScript, Bootstrap, Maven, Apache Tomcat, MySQL

- Built a comprehensive web-based platform for managing doctor and patient data.
- Implemented modules for user registration, login, appointment scheduling, and admin tools.
- Streamlined data integration with MySQL for efficient record storage and retrieval.
